PROFESSIONAL PROJECTS

Ecommerce
Technologies:- React.js, Node.js, Express, MongoDB
This website was made by using full Mern stack languages. I used Redux and React to build the website. To produce user information, I use bcrypt.js and jsonwebtoken. On this website, email is also shot using Nodemailer. All information about the user is stored in MongoDB as a database.

Blog Website
Technologies:- React.js, Node.js, Express, MongoDB
This project aims to provide a platform for users to create, read, update, and delete blog posts. Users can register and log in to manage their blogs, comment on others' posts, and engage in discussions. The combination of React and MongoDB allows for a dynamic and responsive user experience.

Dairy Application Admin Panel
Technologies:- Angular, Node.js, Express, MongoDB
This panel contains the login to the admin of the Application. create the UI using Angular while the backend is NodeJS followed by MongoDB database. Admin can add the products with a brief description, and images while these products are displayed on the dashboard.

Weather Tracker
Technologies:- Javascript, Bootstrap, Open API
This website uses Javascript and Open Weather API. I use geolocation of JavaScript which gives me the weather of the user.
